Prespecified first 10 ordinary IDs: paired change versus FT P / FT V; common PQ initial magnitude 1 pu
Dots: median within-scenario change per seed; negative values reduce violations
case300: P-generation excess (MW)
case300: Q-generation excess (MVAr)
case300: Voltage excess (pu)
case300: Branch excess (MVA)
Seed 11
Seed 22
Seed 33
